

StarShip Link for ACCPAC Advantage Series

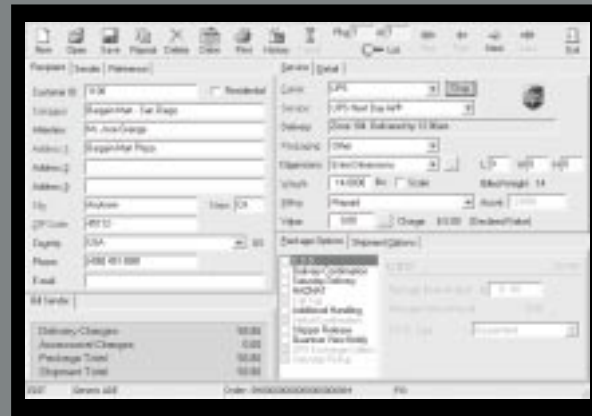

StarShip Link is part of a complete shipping tracking and management system when combined with StarShip, by V-Technologies.

The StarShip Link for ACCPAC Advantage Series provides a two-way link to send shipping information to and from StarShip shipping software and ACCPAC Advantage Series Order Entry. An order is selected for shipment. Relevant shipment data is passed to the StarShip program, which opens up automatically when it detects new data to process. The shipper, shipping method, and settings to use are passed from O/E to StarShip automatically—the user simply has to enter the package weight(s). Shipping documentation is printed out through StarShip. When the shipment is saved, StarShip sends the shipping charges, number of packages, and tracking number back to ACCPAC Advantage Series Order Entry. The shipping data from StarShip can be posted to the order as a miscellaneous charge. Shipping charges brought in from StarShip can be marked up, rounded, checked for minimum values and surcharged.

STARSHIP

Key Features

- Fully integrated into ACCPAC Advantage Series Order Entry
- Eliminates manual data entry into shipping software and of shipping charges back into Order Entry
- Highly configurable customer/ship-to processing defaults
- Works with StarShip Shipping which allows for multiple carriers, rate shopping, label and document print

System requirements

- ACCPAC Advantage Series Order Entry 4.1 or higher, Pervasive SQL

StarShip, by V-Technologies, LLC is available directly from MJD Software, when purchased with a copy of MJD Software's StarShip Link for ACCPAC Advantage Series.

An order is selected for shipment ■ Relevant shipment data is passed to StarShip ■ StarShip allows for rate shopping between carriers and methods ■ StarShip prints out the shipping documentation ■ When the shipment is saved, StarShip sends the shipping charges, number of packages, and tracking number back to Order Entry.
